- Designing Web Pages
- Design of Mobile responsive, bite-size learning materials
- Creation of Interactive Sports-Related Materials (see below broader description)
- Communication platform development
- Board Game development
- Development of Interactive Videos

SMART NEST ARE EXPERTS IN

- Digital learning solutions
- Web page development
- Production of Videos and animations
- Youtube dissemination
- Mobile responsive web content development
- Entrepreneurship and Entrepreneurial mind-set
- Green business, Circular Economy, ESG reporting
- Founder of Smart Nest is as well a president of the parent council in a school of 1000 pupils

SMART NEST employs the most recent **digital learning and E-learning** development solutions and intends to incorporate new and innovative tools into E-learning course modules, such as interactive videos (videos that can stop at a pre-determined time and reveal additional information, for example, to emphasize some important details or explain activities or movements).

SMART NEST also develops **bite-size digital** microlearning materials, focusing on presenting them on **mobile devices**.

SMART NEST develops visually appealing **web pages** which look great as well on mobile devices. Team now has developed more than 13 websites for different Erasmus projects and private business ventures.

Another field of experience of SMART NEST is **development of networking and communication platforms**. We have designed platform which was part www.kidpreneurship.eu project and now we are working on Sportentre.eu networking platform as well.

Smart Nest owns and develops its own **Youtube channel** “All Things Smart” (<https://youtube.com/@allthingsmart>) with ambition to become one of best known channels for Erasmus+ project result dissemination.

SMART NEST team's most preferred sport activities are **running, orienteering** and overall community's physical activity. We are part of www.kontrolpunkti.lv which develops photo orienteering events (scavenger hunts) – a great activity to increase physical activity level in schools and other societal groups.

SMART NEST and its founder Juris Riekstins have vast experience working with business start-

ups, preparing and evaluating business concepts, business models, and business strategies. Juris Riekstins is also actively working in the field of Entrepreneurial Mind-Set, with various learning resources in the works on the subject.

SMART NEST can evaluate the project's continuous quality assurance, which is a score- based evaluation that is performed throughout the proposal's implementation life cycle.

SMART NEST can create Interactive E-learning Modules using contemporary authoring tools, which may be used as outstanding off-court or theoretical teaching material for **SPORTS**. Trainees can use it at home to practice various moves or playouts in **team sports**. The following examples demonstrate how to study player roles in team sports and how to utilize drag and drop technologies to learn through knowledge quizzes (templates of exercises where user should put players in the right positions). These resources are also appropriate for parents, so that parents may better comprehend what their children are learning and help them understand the fundamentals so that they arrive at the training more prepared.

Name and function	Organisation	Role/tasks	Professional profile and expertise
Juris Riekstins	Smart Nest	Project manager	J.Riekstins holds a Masters degree in business administration (MBA) he has more than 15 years experience in implementation and management of different public finance projects, starting from nationally administered ERAF, Interegg to Erasmus KA2 and Erasmus Knowledge Alliances.
